FLOW GAUGE FOR RETURN FLOW

Flow gauge for return flow

Starting problems in diesel engines are often caused by faulty diesel injectors. This kit is extremely suitable for controlling the return flow of injectors, which are often causing the problem. It is possible to control 6 injectors at the same time, quickly and efficiently. The kit contains equipment to check the following brands: BOSCH, SIEMENS, DENSO and DELPHI.

Content:

- 6 x adapters: for Bosch injectors
- 6 x adapters: for Siemens injectors
- 6 x adapters: for Delphi injectors
- 6 x adapters: for Denso injectors
- 6 x measuring bottles for use, capacity 105 ml
- 6 x fuel-resistant transparent hoses 650 mm
- 6 x manometry pipes, capacity 95 ml

Part No. JOCAUC
